

ASSESSMENT TOOL 2

NAME: Bhuvaneswari S

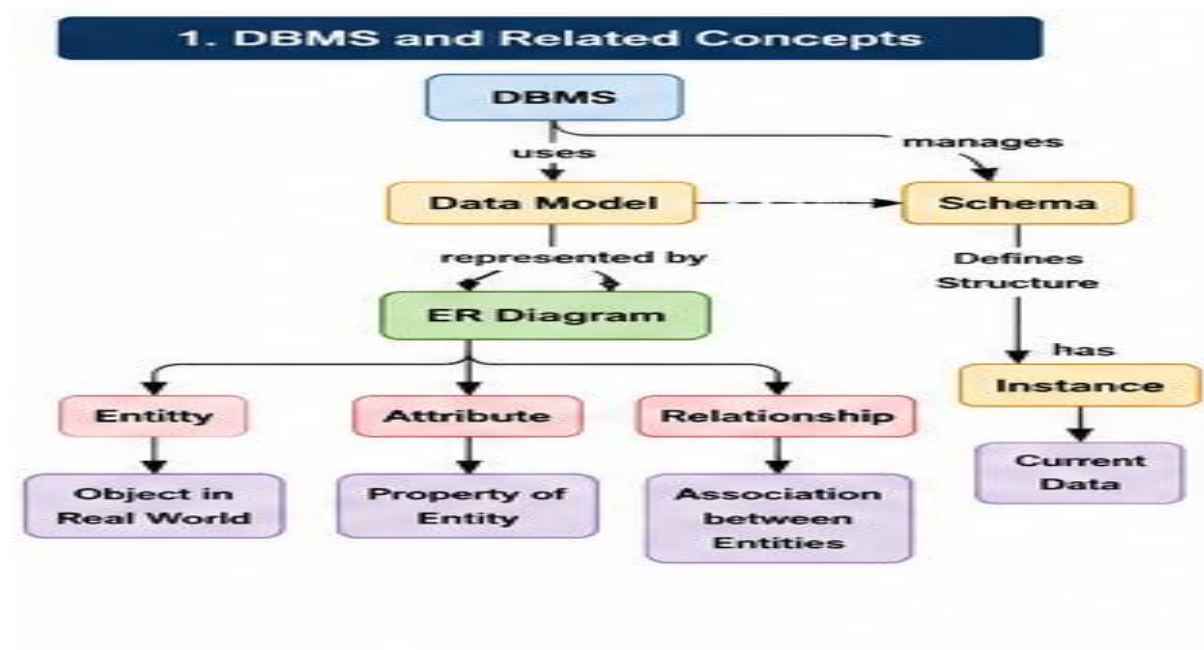

REG NO:19571048

COURSE NAME: Database Management Systems

COURSE CODE: CSA05

Q1. Concept Map: DBMS, Schema, Instance, Data Attribute, Relationship

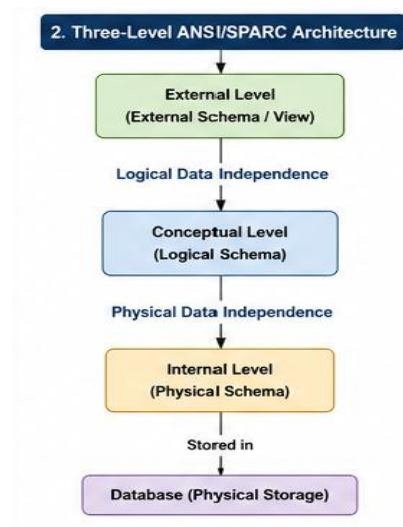

Model, ER Diagram, Entity,

Key Idea

- DBMS uses a data model.
- Data model is represented using an ER diagram.
- ER diagram contains entities, attributes, and relationships.
- Schema defines the database structure.
- Instance represents the current data stored.

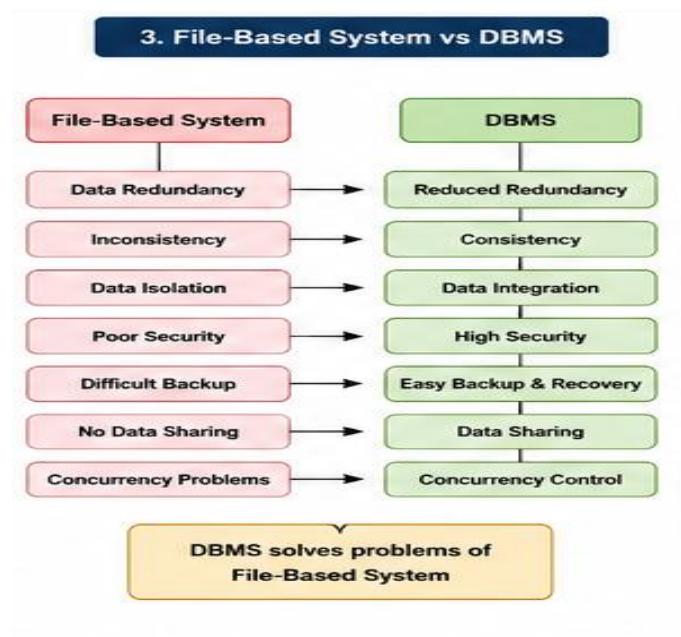

Q2. ANSI/SPARC Architecture with Data Independence

Concepts

- External → User View
- Conceptual → Logical Structure
- Internal → Physical Storage

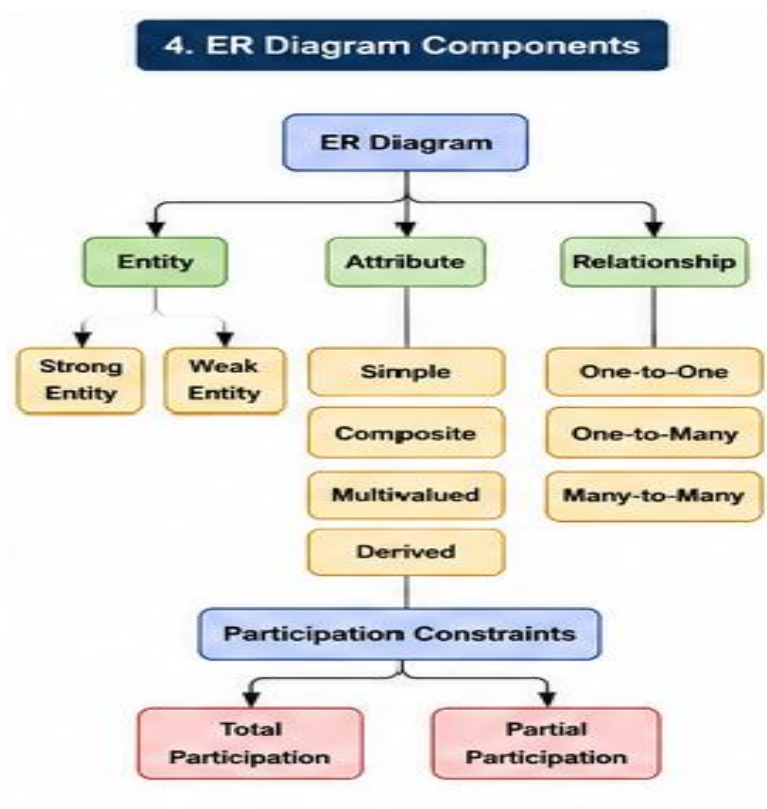

Q3. File System vs DBMS

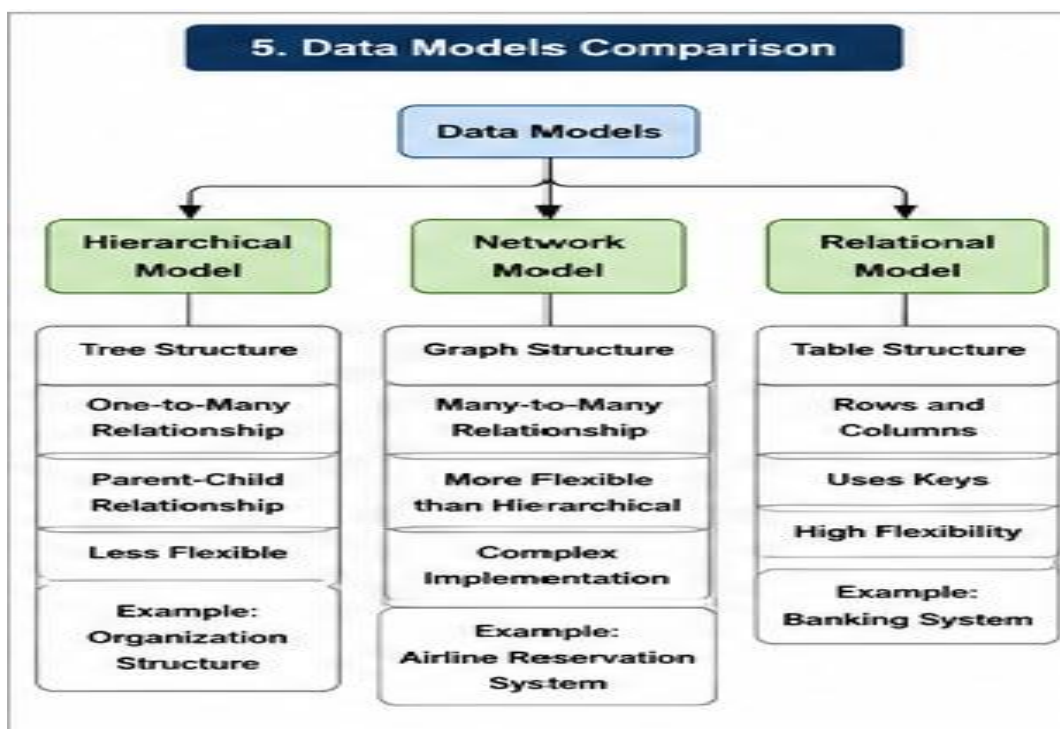

DBMS solves

- Data redundancy
- Inconsistency
- Poor security
- Difficult backup
- Data isolation

Q4. ER Diagram Components

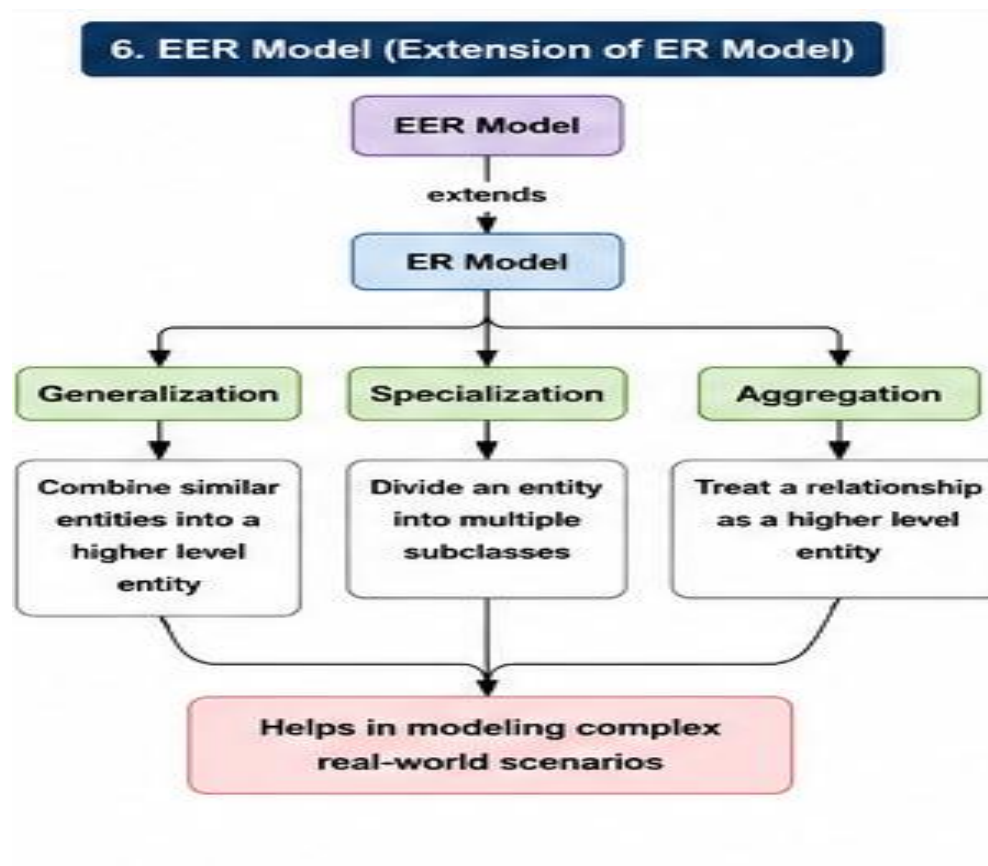

Q5. Data Models Comparison

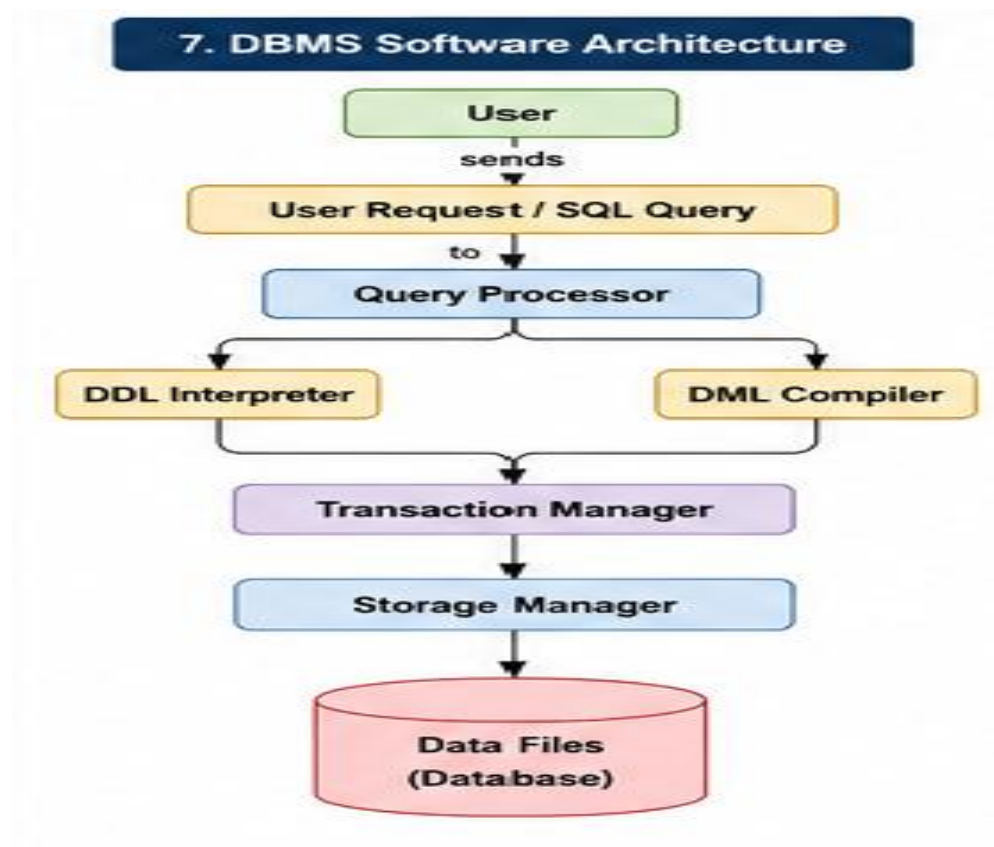

Applications

- Hierarchical → Organization Chart
- Network → Airline Reservation
- Relational → Banking System

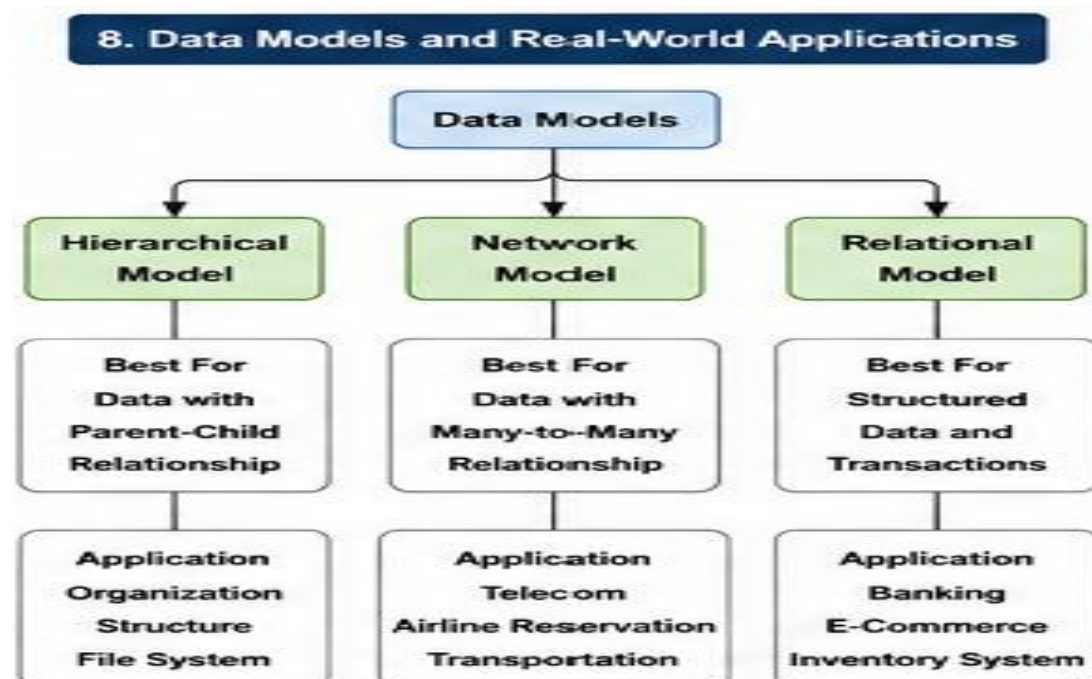

Q6. EER Model

Q7. DBMS Software Architecture

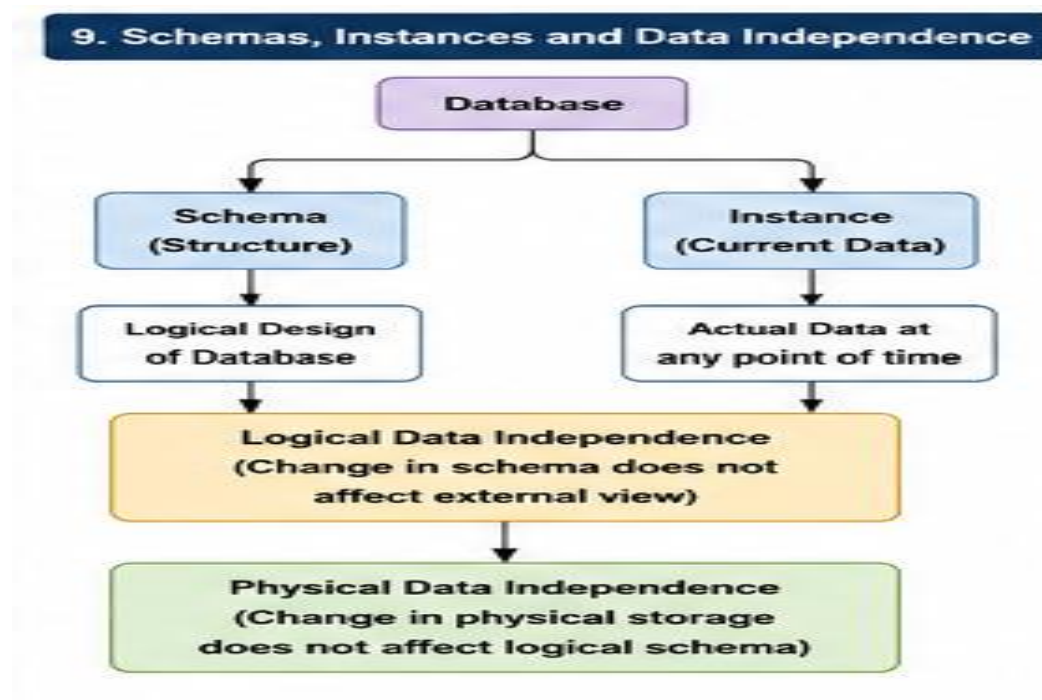

Q8. Data Models and Applications

Suitability

- Hierarchical → Parent-child relationships
- Network → Multiple connections
- Relational → Structured business data

Q9. Schema and Instance

Q10. Roles in DBMS
